

BLOWER SERVICE

Have your blower serviced by a professional who will ensure it is operating at peak performance for trouble free blowing, to save you time and money.

A standard service entails;

- Visual inspection of the whole blower
- Inspect and clean the air filter and replace if required
- Clean the fuel filter and replace it if required
- Clean the fuel tank
- Check the operation of the safety throttle lock
- Check the operation of the throttle trigger
- Inspect the control grip
- Check the starting mechanism, the rope and all the starter components
- Adjust the high and low speed jets for the carburettor
- Set the maximum RPM
- Readjust the idle
- Check the spark plug and replace if required
- Clean the spark arrestor screen and replace if required
- Check all fasteners and tighten if required
- Check the shredder blade if applicable
- Check the air spouts
- Start, test and clean the machine

It is a complete and thorough service of your machine.
