

CHAINSAW SERVICE

Have your chainsaw serviced by a professional who will ensure it is operating at peak performance for trouble free cutting, to keep you warm and save you time and money.

A standard service entails;

- Visual inspection of the whole saw
- Clean the air filter and replace if required
- Check the operation of the throttle trigger, control grip, safety throttle lock and stop switch
- Clean the fuel filter (replace if required) and clean out the fuel tank
- Clean chain oil tank and check chain oil lubrication
- Adjust the high and low speed jets for the carburettor
- Set maximum rpm
- Clean cylinder fins, cooling inlets and spark arrestor screen
- Inspect the anti-vibration mounts
- Inspect the chain for wear and damage and sharpen if required
- Check chain sprocket and inspect for wear
- Inspect wear and damage on guidebar, clean & turnover, and dress if required
- Clean and check operation of chainbrake
- Check spark plug and replace if required
- Run, test & clean.

It is a complete and thorough service of your machine.
