

HEDGETRIMMER SERVICE

Have your hedgetrimmer serviced by a professional who will ensure it is operating at peak performance for trouble free cutting, to save you time and money.

A standard service entails:

- Visual inspection of the whole hedgetrimmer
- Adjust the high and low speed jets for the carburettor
- Set maximum RPM
- Readjust the idle
- Check and clean air filter/s or replace it if required
- Check and clean the fuel filter and replace it if required
- Check the spark plug and replace it if required
- Check the muffler and mountings
- Check and clean the spark arrestor screen and replace it if required
- Check the starting mechanism, the rope and all the starter components
- Inspect the control grip
- Check the operation of the safety throttle lock
- Check the operation of the blade brake if it has one
- Check the blades and sharpen on the hedgetrimmer blade jig if required
- Check and grease the gearbox if required
- Check and tighten all fasteners
- Start, test and clean the machine

It is a complete and thorough service of your machine.
