

Hiring Vs Buying

Hiring plant and equipment offers many advantages over buying something outright. Some of these advantages are as follows;

- | **Hiring saves money** No capital outlay is required so you can meet demand quickly and easily, and give you immediate access to a massive range of modern equipment. Hiring frees up capital to allow you freedom to explore and develop other priority areas. Hiring will save you on labour costs. You can save on costs on registration and the hassles of doing that. By hiring you can save money on insurance, repairs and maintenance, storage and importantly depreciation. Hiring saves a lot of money.
- | **Hiring makes work easy** The latest equipment makes difficult tasks easy and allows yourself or your staff to be safer and more productive.
- | **Peace of mind** Hiring gives you peace of mind because you don't have to do anything else but to pick it up, do your job and return it. That's it, peace of mind. No more paperwork, servicing & repairs, insurance and other headaches.
- | **Business Hiring is Tax Deductible** Tax invoiced paperwork makes accounting easy, and its all tax deductible.
- | **Reliable Equipment** Nothing is more reliable than our equipment. We have constant upgrades which means the safest, latest and the most modern equipment. Our equipment is cleaned, serviced and tested before each hire. The constant serving and testing combined with new machinery ensures reliable and efficient equipment.
- | **Meet peek demands** When things get busy, add equipment to get jobs done by hiring. You can even hire for half a day to reduce your costs even further.
- | **Try before you buy** Trial equipment before making a capital outlay. Test it out properly in your own environment and see if it does the job you need. If it's a machine that we sell and you buy it from us, the hire is on us, a free hire.
- | **You're the boss** Plan when the equipment is and isn't needed. Have peace of mind knowing that if you want something for a particular time and date, it will be there for you.
