

MOTOR SERVICE

Have your motor serviced by a professional who will ensure it is operating at peak performance for trouble free running, to save you time and money.

A standard service entails;

- Visual inspection of the whole motor
- Check and adjust engine RPM if required
- Check engine oil and top up or replace if required
- Check and clean fuel filter or replace if required
- Check and clean air filter/s and replace if required
- Check the muffler and mountings
- Check the starting mechanism, the rope and all the starter components
- Check the spark plug and replace if required
- Check all fasteners and tighten if necessary
- Run and clean

It is a complete and thorough service of your machine.
