

PRESSURE CLEANER SERVICE

Have your pressure cleaner serviced by a professional who will ensure it is operating at peak performance for trouble free cleaning, to save you time and money.

A standard service entails;

- Visual inspection of the whole pressure cleaner
- Check the oil level and change or top up as required
- Visual inspection of the electrical cord and repair if unsafe
- Visual inspection of the electrical plug and repair if unsafe
- Visual inspection of the high pressure hose
- Visual inspection of the hose fittings
- Inspect and clean the water filter or replace if required
- Check and adjust the water pressure as required
- Check the switch off pressure
- Check and clean out the high pressure nozzle or replace if required
- Check for oil leaks
- Inspect the safety regulator block
- Electrical test and tag for earth continuity
- Run, test and clean

It is a complete and thorough service of your machine.
