

RIDE ON MOWER SERVICE

Have your ride on mower serviced by a professional who will ensure it is operating at peak performance for trouble free mowing.

A standard service entails;

- Visual inspection of the whole machine
- Change engine oil and check transmission oil if applicable
- Check and change oil filter if applicable
- Check and clean fuel filter and air filters and replace if required
- Check spark plug and replace if required
- Check muffler and tighten or adjust as required
- Check all engine components, tune and adjust as required
- Check battery, fill and clean terminals if required
- Check and adjust cutting deck
- Check all belts for wear and retension or replace if required
- Check all bearings and spindles
- Check cutting blades and sharpen or replace as required
- Check chassis, linkage and undercarriage
- Check and adjust braking system if required
- Check and adjust all steering components and wheel alignment
- Check tyre pressure and wear, and adjust as required
- Check entire drive system
- Check and tighten all fasteners
- Check all cables, levers and controls and lubricate if required
- Test the machine once serviced and then clean down

It is a complete and thorough service of your machine.
