

VACUUM CLEANER SERVICE

Have your vacuum cleaner serviced by a professional who will ensure it is operating at peak performance for trouble free vacuuming, to save you time and money.

A standard service entails;

- Visual inspection of the whole vacuum cleaner
- Check and clean the filter/s or replace it if required
- Inspect the electrical cord and repair if damaged
- Inspect the electrical plug and repair if damaged
- Clean out the vacuum canister
- Inspect all castors and wheels
- Inspect all the handles and housings
- Check the suction pressure
- Check the vacuum hose and all its fittings
- Check the float
- Check and clean the switch
- Electrical test and tag for earth continuity.
- Start, test and clean the machine.

It is a complete and thorough service of your machine.
